**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, and 7-8 are, drawn to a system for monitoring and displaying information pertaining to weather data at a particular location, classified in class 340, subclass 539.1.
  - II. Claim 6 is, drawn to a system for encoding weather data to be transmitted, classified in class 455, subclass 186.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions because invention I is directed to a system of monitoring, detecting, and displaying data pertaining to weather conditions at a particular location, whereas invention II is directed to a method of encoding weather data to be transmitted.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
